PARTS LIST

PART #	PART DESCRIPTION	QTY
00FR-1	Top Rail Frame Pieces	8
00VPS-1	Vented Safety Pad	1
00JM-1	Jumping Mat	1
00SPR-1	Springs	104
00LE-1	Leg Extensions	8
00LB-1	V-Shaped Leg Bases	4
00SW-1	Leg screws and Washers (each)	8
00T-1	Spring tool, Screw driver, and wrench	1
00SW-2	Frame nuts, Bolts, and Washers (each)	8

INSTALLATION INSTRUCTIONS

Refer to **PARTS LIST** for identification of parts.

WARNING: Two adults in good physical condition are required for the following assembly. For your safety, you should wear gloves. Failure to follow these instructions and warnings may result in injury.

NOTE: Picture may vary slightly with different trampoline models

Please layout all parts and items, and ensure you will be working on a level smooth surface.

1. Lay out all the trampoline parts in groups, as shown above on a level installation surface. Ensure you have all necessary components by checking the parts list.

2. Connect the 8 Top rail Frame pieces together, and secure them with the provided Frame Nuts, bolts and washers.

3. Once the Top Rail Frame Pieces are secured, insert the Leg Extension pieces into the Top Rail Frame Neck joints.

4. Ensure that the Leg Extension piece is inserted with the Hole for the Leg Screws at the bottom, facing inside (towards the center of the trampoline.)

CONTINUED...

NOTE: Steps 5-9 are only necessary for those that have also purchased the optional TDU Retaining Wall System for **IN-GROUND** installations only. If you did not purchase the optional retaining wall system, please skip to step 10 to complete your trampoline installation.

5. At this step, remove the TDU retaining wall panels, and connect them individually around the Frame of the Trampoline. Insert Each interlocking panel together, surrounding the Frame of the Trampoline.

6. Once the kit is completely connected and is surrounding the Top Rail Frame, raise the frame of the Trampoline until it is flush with the top of TDU retaining wall kit.

7. Set the Provided Self Tapping Screws (that come with the TDU Retaining wall system) into the corner of the buckle joint as shown for each panel, securing the panels to the frame of the Trampoline.

*5/16 Hex- bit also provided

8. Once the Entire retaining wall system is secured, insert the V-shape Leg Bases into the Leg Extensions, and secure them with the provided Leg Bolts and washers.

CONTINUED...

9. Once the TDU retaining wall system and Trampoline Frame have been properly installed in the ground, with proper backfill, (inside and outside) you are now ready to complete the trampoline installation.

10. Lay out the Jumping mat in the center of the Trampoline Frame and begin to attach the Springs 1 at a time, 5 Holes apart from each other.

11. Once you have attached springs every fifth hole, go back and attach springs to the right of each spring until you have once again gone all the way around.

12. Repeat this process until all springs are attached and the mat is fully stretched.

13. Secure the Vented Safety Pad by slipping a spring through the Front Pad loop, and then tie the rear pad ties around the Top Rail frame of the trampoline.

14. Once the Safety Pad is Secured- you are ready to enjoy your new Trampoline in-ground or above Ground!

TRAMPOLINE GUIDELINES

1. GENERAL INSTRUCTIONS

1.1 PURPOSE

- The TDU systems Trampoline is intended for home/domestic (above or in-ground) use only and is not suitable for professional or medical uses.
- The maximum weight is 450lbs. overloading the trampoline above the recommended user weight will cause damage to the trampoline which is not covered by the warranty.

1.2 DANGER FOR CHILDREN

- Do not let unsupervised children near this product. Carry out the necessary safety precautions and supervise all trampoline activities. Be aware that the packaging material is not suitable for children. There is danger of suffocation.
- This Trampoline is not recommended for children under 6 years of age. Installing this trampoline at ground level (with additional TDU retaining wall kit *not included*) will help reduce the risk of injury from young children falling off of a trampoline above ground.

1.3 ATTENTION – PRODUCT DAMAGES

- Do not alter the product. Only use TDU system approved components. Repairs should only be carried out by qualified TDU technicians. Improper repairs can compromise the safety of your trampoline.
- We recommend removing the Vented Pad, springs, and Mat during the winter months if you are in an area that gets consistent snow fall.

1.4 ADVICE FOR THE ASSEMBLY

- The assembly of the product must be done carefully by at least two able-bodied adults. If in any doubt, please contact your local dealer, or a TDU representative.
- Before you start assembling the trampoline, read all the instructions in this manual.
- Remove all packaging materials and lay down all parts on a level open space. This gives you an overview and simplifies the assembly procedure.
- Check with the parts list that no parts are missing. Dispose of the packaging material when the assembly is completed
- Beware that when using tools or doing technical work, there is always a risk of injury.
- Store the packaging material in a way that cannot cause any danger. Foils and plastic bags are dangerous for children (danger of suffocation)

CONTINUED...

- After installing the product according to the instruction manual, please make sure that all screws, bolts and nuts are securely fastened, and that all joints are tightly fixed.
- Ensure the trampoline has proper clearance above and around the trampoline area. We recommend at least 25ft above, and 5ft around the trampoline to be free from any obstruction.
- Ensure that the trampoline is set up properly before use.
- The metal frame of the trampoline will conduct electricity. Lightning, extension cords and all electrical equipment must never be allowed to come in contact with the trampoline.
- The trampoline must always be used in a well-lit area.
- Do not place any objects beneath the trampoline, or allow children to play under the trampoline as injury may result.
- When assembling or disassembling, please use gloves to protect your hands.

1.5 ADDITIONAL TIPS

- We recommend installing your Trampoline at ground level (using our TDU retaining wall system ** Not included) But if you are using this trampoline above ground we recommend securing the trampoline to the ground in case of high wind scenarios that may cause damage to the trampoline.
- Do not use during pregnancy.
- Do not use when suffering from high blood pressure.
- Jump with bare feet. Do not wear shoes; this will damage the jumping mat which is not covered by the warranty.
- No smoking on or around the trampoline, as damage to the Mat and Pads may result.
- Do not place pets, sharp objects, or any other foreign objects, on the trampoline.
- Do not use the trampoline while under the influence of alcohol or drugs.
- Do not sit or lean on the vented safety pads while someone is jumping.
- Do not allow children to pull themselves up on the trampoline by hanging on to the safety pad.
- Do not remove warning safety Tags on the jumping mat.
- Do not allow children to jump without proper training or instructions.
- If the Trampoline is not going to be used IN-GROUND, ensure it is on a level surface, preferably grass, and secured or anchored to the ground.
- Do not expose the trampoline to direct contact with open flames, and ensure that it is more than 10' away from any fire pit area to protect it from damage.
- Secure the trampoline against unauthorized use.
- Do not use if trampoline jumping mat is wet.

CONTINUED...

- WARNING:**
1. Do not attempt or allow somersaults or flips. Landing on your head or neck can cause serious injury, paralysis, or even death.
 2. Do not allow more than one person on the trampoline at a time. Use by more than one person at the same time increases the chance of injury.
 3. Use Trampoline only with adult or mature supervision.

2. SAFETY INSTRUCTIONS FOR TRAMPOLINE

- All users of the trampoline need a supervisor. Regardless of the age and the experience of the user.
- The safety instructions of the trampoline should always be considered and obeyed.
- Examine and inspect the trampoline for damage, wearing, or defective parts before each use.
- Any damaged, worn out, or defective parts should be replaced immediately.
- The trampoline must be set up IN-GROUND (with the use of the TDU retaining wall system ****Not included****) or on flat ground, on soft, non-slippery surfaces.
- If the trampoline is above ground, Strong winds can blow the trampoline away. If strong winds are predicted, we recommend moving the trampoline to a safe place, or securing the trampoline to the ground.
- Try to avoid the moving the assembled trampoline, Should it be necessary to move the trampoline please consider using 4 adults to lift at even spacing to ensure the trampoline is level while moving it.
- Trampolines are jumping devices, enabling the user to jump to unusual heights. Jump only on the Jumping mat, landing on the frame, cover pads or off of the trampoline can lead to injury.
- Users should be familiar with the user manual. This manual contains assembly instructions...
selected precautionary measures, as well as recommendations for servicing and maintenance of the trampoline.
- Do not stick any foreign objects into the trampoline.
- Do not allow anyone or any object to go under the trampoline while someone is jumping. Serious Injury may result.
- The trampoline should only be used when the jumping mat is clean from debris, and dry. Jumping with dirt or items on the trampoline may cause injury, or damage to the trampoline.
- It is the responsibility of the owner or the supervisor to guarantee that all users of the trampoline are informed, and that there is sufficient space above and around the trampoline as a safety precaution.

WARRANTY & CONTACT INFORMATION

We stand behind our products 100% and offer the best warranty in the industry.
Should you have any product related defects, please contact us directly.

For all warranty related issues, be sure to go to our website and download & submit
the product registration form.
